Afrobarometer Round 10 Survey in 38 Countries Merged Codebook

Prepared by Alfred Torsu, August, 2026

AFROBAROMETER
Let the people have a say

User Guide

About
Afrobarometer (AB) is a pan-African, non-partisan survey research network that conducts public attitude surveys on democracy, governance, the economy, and society. We are the world's leading source of high-quality data on what Africans are thinking.

Our vision is "A world in which Africa's development is anchored in the realities and aspirations of its people".

AB is a non-profit company limited by guarantee with headquarters in Accra, Ghana.

For more information about Afrobarometer, visit our https://www.afrobarometer.org/about/

Citation
Afrobarometer data are protected by copyright. Authors of any published work based on Afrobarometer data or papers are required to acknowledge the source, including, where applicable, citations to data sets posted on the website. Please acknowledge the copyright holders in all publications resulting from the use of Afrobarometer data by means of bibliographic citation in this form:

Afrobarometer Data, [Country(ies)], [Round(s)], [Year(s)], available at http://www.afrobarometer.org.

We also ask users to send/email copies of any publications, papers, or reports that employ Afrobarometer data to Brian Howard, Afrobarometer's head of publications, at bhoward@afrobarometer.org

Data Weights
Afrobarometer includes four weights in our datasets. Two weights are used in all country-level datasets, and an additional two weights are used in our multi-country, merge datasets for each round. The **withinwt_ea** and **withinwt_hh** weights correct for over-and under-sampling at the national level. Each respondent is assigned a weight based on the inverse of their probability of selection, accounting for factors like geographical region and urban-rural distribution. The difference between the two withinwt variables is that while withinwt_ea accounts for enumeration population size, withinwt_hh factors in enumeration population AND household size, and is not available for earlier rounds of the survey.

In each merge dataset, we have two additional weight variables, combinwt_ea and combinwt_hh. These weight variables are based on the withinwt_ea and withinwt_hh variables, but they also standardise all national samples in the merge dataset so that each country has equal weight in the continental average.

In general, a weighting variable should be used when reporting national (withinwt_ea or withinwt_hh) or cross-national (combinwt_ea or combinwt_hh) results to ensure accuracy and reliability when making generalisations or drawing conclusions at the national level or multi-country level.
For more information on Afrobarometer sampling protocols and weight construction, please visit our webpage

NOCALL Variables (Unit non-response)

In Afrobarometer surveys, interviewers record unsuccessful household calls as a "NOCALL". Reasons for unsuccessful calls may include (but are not limited to) refusals to interview by the selected respondent or household members, absence of the randomly selected respondent, or respondents not meeting the selection criteria (citizens over the age of 18 who speak one of the survey languages). These NOCALLs are recorded as variables embedded in each successful case. If interviewers have five unsuccessful calls before a successful interview, users will find that NOCALL1 to NOCALL5 contain the reasons for the unsuccessful calls before the successful interview.

Non-response coding

Afrobarometer utilises a standardised set of non-response codes across all questions and surveys. They are as follows:

- Missing=-1 (no "system missing" data or empty cells)
- Don't know= 9, 99, 999 or 9999
- Refused to answer=8, 98, 9998 or 9998
- Not Applicable=7, 97, 997 or 9997
- No Further Response/Answer=96, 996 or 9996
- Not asked in country=9994

Computed variables:

AB data sets include three computed variables that are Afrobarometer's signature indicators of Lived Poverty, Demand for Democracy, and Supply of Democracy, each of which is described below.

Lived Poverty Index (LPI):

> "As a contribution to the tracking of poverty in Africa, Afrobarometer offers the Lived Poverty Index (LPI), an experiential measure that is based on a series of survey questions about how frequently people actually go without basic necessities during the course of a year. The LPI measures a portion of the concept of poverty that is not captured well by other measures, and thus offers an important complement to official statistics on poverty and development (Mattes, 2008)"[1].

The LPI is computed both as a raw average of the frequency with which respondents go without five basic necessities (Q7A-E), and as a categorial variable that groups respondents as experiencing no, low, moderate or high lived poverty.

The following syntax is used to generate these two variables (in .sps format).

RECODE

        q7c_r 'Go W/O Medical Care'
        q7d_r 'Go W/O Cooking Fuel'
        q7e_r 'Go W/O Cash Income'.
EXECUTE.

COMPUTE LivedPoverty = (q7a_r + q7b_r + q7c_r + q7d_r + q7e_r)  / 5.
VARIABLE LABELS LivedPoverty 'Lived Poverty Index (average index of 5 poverty items)'.
EXECUTE.

* Recode LPI to the categorical variable.

RECODE
  LivedPoverty
  (0=0) (0.2 thru 1.0 =1) (1.2 thru 2.0 = 2) (2.2 thru 4.0 =3) INTO
  LivedPoverty_CAT.
VARIABLE LABELS LivedPoverty_CAT 'LPI_Categorical'.
VALUE LABELS LivedPoverty_CAT 0 "No Lived Poverty" 1 "Low Lived Poverty" 2 "Moderate Lived Poverty"
 3 "High Lived Poverty".
EXECUTE.

Format LivedPoverty_CAT(F3.0).
EXECUTE.
```

Demand for Democracy (DemandDemo):

DemandDemoI' is a long-standing Afrobarometer indicator that combines explicit support for democracy (Q22) with rejection of all three non-democratic alternatives (Q21) – one-party rule, military rule, and strongman/one-man rule – using the following syntax:

```
RECODE
Q21A Q21B Q21C (5=0) (4=0) (3=0) (2=1) (1=1) (9=0) (ELSE = SYSMIS) INTO q21a_r1 q21b_r1 q21c_r1  .
VARIABLE LABELS
        q21a_r1 'reject 1 party rule, no-yes'  /
        q21b_r1 'reject military rule, no-yes' /
        q21c_r1 'reject pres dictatorship, no-yes'  .
EXECUTE.

**** compute DEMAND FOR DEMOCRACY

COMPUTE DemandDemo = (q22_r1 +  q21a_r1 +  q21b_r1 + q21c_r1 ).
VARIABLE LABELS DemandDemo 'Demand for Democracy (additive index of 4 democratic commitments:
support (1,2=0)(3=1)(else=sysmis) + reject (5,4,3,9=0)(2,1=1)(else=sysmis)' .
VALUE LABELS  DemandDemo 0 "No demand for democracy" 1 "Agrees w/ 1 of 4 components" 2 "Agrees w/ 2
of 4 components"
3 "Agrees w/ 3 of 4 components" 4 "Full demand for democracy".
EXECUTE .
```

Supply of Democracy (SupplyDemo):

SupplyDemo combines the indicators of perceived extent of democracy (Q32) and satisfaction with the way democracy works (Q33) to provide a single indicator of the extent to which governments are supplying democracy to their citizens. The syntax is as follows:

```
RECODE
 Q32 (1=0) (2=0) (9=0) (8=0) (3=1) (4=1) (ELSE=SYSMIS) INTO q32_r1.
VARIABLE LABELS q32_r1 'how democratic is govt recoded, 0-1, dk=0'.
EXECUTE.

RECODE
 Q33 (0=0) (1=0) (2=0) (9=0) (3=1) (4=1) (ELSE=SYSMIS) INTO q33_r1.
VARIABLE LABELS q33_r1 'satisfaction with democracy recoded, 0-1)'.
EXECUTE.

COMPUTE SupplyDemo = (q32_r1 + q33_r1).
 VARIABLE LABELS SupplyDemo 'Supply of Democracy (additive index of 2 items: satisfaction
(0,1,2,9=0)(3,4=1)(else=sysmis) + extent (1,2,8,9=0)(3,4=1)(else=sysmis)'.
VALUE LABELS  SupplyDemo 0 "Perceives no supply" 1 "Perceives supply of one, not both" 2 "Perceives full
supply of democracy (Extent +Satisfaction)".
EXECUTE.

Format  SupplyDemo  (F3.0).
EXECUTE.
```

Limitations of Afrobarometer Data

Afrobarometer uses national probability sampling designed to generate a sample that is a representative cross-section of all citizens aged 18 and above. Samples usually include either 1,200 or 2,400 cases. A randomly selected sample of n=1,200 cases allows inferences to national adult populations with a margin of sampling error of +/-2.8 percentage points with a confidence level of 95%. With a sample size of n=2,400, the margin of error decreases to +/-2.0 percentage points at a 95% confidence level. The margins of error will increase for sub-national groups (regions, demographic groups, etc.). While efforts are made to minimize nonresponse, some biases may exist if certain groups are underrepresented in the final sample.

4	Somewhat positive	11661
5	Very positive	6577
8	Refused	110
9	Don’t know	9517
9994	Not asked in country	1200

Q67B

	Value	Count
Label	Q67b. Influence of country: China	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
1	Very negative	3338
2	Somewhat negative	4595
3	Neither positive nor negative	2473
4	Somewhat positive	15150
5	Very positive	12955
8	Refused	83
9	Don’t know	7007

Q67C

	Value	Count
Label	Q67c. Influence of country: United States	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
1	Very negative	3975
2	Somewhat negative	5000
3	Neither positive nor negative	3335
4	Somewhat positive	14081
5	Very positive	9455
8	Refused	115
9	Don’t know	9639

Q67D

	Value	Count
Label	Q67d. Influence of country: Russia	
Type	Numeric	
Measurement	Ordinal	

-1	Missing	0
1	Very negative	4433
2	Somewhat negative	6164
3	Neither positive nor negative	4406
4	Somewhat positive	10530
5	Very positive	5696
8	Refused	142
9	Don’t know	14229

Q67E

	Value	Count
Label	Q67e. Influence of country: India	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
1	Very negative	3650
2	Somewhat negative	5315
3	Neither positive nor negative	4688
4	Somewhat positive	12052
5	Very positive	5775
8	Refused	137
9	Don’t know	13983

Q67F

	Value	Count
Label	Q67f. Influence of organization: African Union	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
1	Very negative	2426
2	Somewhat negative	3603
3	Neither positive nor negative	3242
4	Somewhat positive	15110
5	Very positive	9822
8	Refused	125
9	Don’t know	11272

Q67G

	Value	Count
Label	Q67g. Influence of organization: Regional organisation	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0

1	Very negative	2878
2	Somewhat negative	3573
3	Neither positive nor negative	2743
4	Somewhat positive	14486
5	Very positive	10203
8	Refused	113
9	Don’t know	10404
9994	Not asked in country	1200

Q67H

	Value	Count
Label	Q67h. Influence of organization: European Union	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
1	Very negative	3557
2	Somewhat negative	4402
3	Neither positive nor negative	3039
4	Somewhat positive	13518
5	Very positive	9343
