

Survey Technical Information
The Quality of Democracy and Governance in
Madagascar
Afrobarometer Round 4, 2008

Dates of Fieldwork:	11 June to 11 July 2008
Sample size:	1350
Sampling frame:	2008 projected population prepared by DIAL based on past demographic evolution patterns and a 2005 household survey (Enquête Periodique Auprès des Ménages, EPM) conducted by Institut National de la Statistique (l'INSTAT).
Sample universe:	Citizens age 18 years or older, excluding institutions
Sample design:	Nationally representative, random, clustered, stratified, multistage area probability sample
Stratification:	6 provinces (Antananarivo, Fianarantsoa, Toamasina, Mahajanga, Toliary, Antsirana) and two residential localities (urban-rural) by province
Stages:	PSUs (from strata), start points, households, respondents
PSU selection:	Probability proportionate to population size (PPPS), but with under-populated regions oversampled
Cluster size:	8 households per PSU in rural areas, 10 households per PSU in urban areas
Household selection:	Random draw from household lists
Respondent selection:	Gender quota filled by alternating interviews between men and women; respondents of appropriate gender were listed, after which household member draws a numbered card to select individual.
Weighting:	Weighted to account for individual selection probabilities and correct for oversampling of under-populated regions.
Margin of error:	+/- 3% with 95% confidence level
Fieldwork by:	DIAL, Paris and COEF-Ressources, Madagascar
Survey Languages: (official translations)	Malagasy
Main researchers:	J.-M. Wachsberger, D. Razafindrasaka, Laetitia Razafimamonjy, M. Razafindrakoto, F. Roubaud
Outcome rates:	Contact rate: 0.784 Cooperation rate: 0.767 Refusal rate: 0.045 Response rate: 0.601
EA Substitution Rate:	0 %
