The Income and expenditure of households 2005/2006 data set has eleven files. The files are flat, ASCII, fixed field files, with one line of given length per record. This format was chosen so as to make the data usable with as many statistical programs as possible, and thus accessible to as wide a range of people as possible.

Other important information for users can be found in the following:

- ◆ Main questionnaire
- ◆ Weekly diary
- ◆ COICOP code list (COICOP type, main group, secondary group and third group)
- ◆ Relevant publications
- ◆ Website (www.statssa.gov.za)

THE INSTRUMENTS FOR DATA COLLECTION

The Income and Expenditure Survey (IES) 2005/2006 used two data collection instruments, namely the main questionnaire and the weekly diary.

Main questionnaire

This is a booklet of questions that was administered to respondents during the course of the survey month. There were five parts in this questionnaire. The first part of the questionnaire dealt with household characteristics including area of purchase and type of retailer with respect to various products purchased by the household. Each of the next three parts of the questionnaire dealt with a different category of consumption expenditure. The final (fifth) part dealt with income.

Weekly diary

This is a booklet that was left with the responding household. The household recorded its daily acquisitions in this booklet in a specific format in columns which enabled the exact nature and type of item to be correctly processed. A household completed a different diary for each of the four weeks of the survey month.

METHODOLOGY

Sample design

- A newly designed Master Sample, consisting of 3 000 Primary Sampling Units (PSUs), based on the 2001 Population Census Enumeration Areas, was used as the sampling frame. The Master Sample is used for all household surveys conducted by Statistics South Africa (Stats SA).
- The 3 000 primary sampling units (PSUs) from the Master Sample were representatively divided into four quarterly allocations of 750 each.
- Within each quarterly allocation, a random sample of 250 PSUs was selected every month.
- Eight dwelling units were systematically selected from each of the sampled PSUs for fieldwork. In total, 24 000 dwelling units were covered during the twelve months of data collection for the IES 2005/2006. This process ensured that the sample was evenly spread over the twelve months, while it remained nationally representative in each quarter.

Coverage

The IES 2005/2006 included all domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers. It did not include institutions such as hospitals, prisons, old-age homes, student hostels and dormitories for scholars. Also excluded were boarding houses, hotels, lodges and guest houses.

Boundary changes

The Municipal Demarcation Board constantly updates administrative boundaries. Since 2001, when the last population census was conducted, changes in administrative boundaries have affected all provinces except Western Cape and Free State. As many as 907 households in the sample changed provinces due to boundary changes. Since the IES sample was selected based on the 2001 population census information and weights were calculated based on the sample information, these households were assigned weights from their previous provinces. In the final dataset, these households were classified under their new provinces, which means that they moved with their weights from their old to the new provincial classification. The provincial boundaries used in the IES 2005/2006 are the December 2005 version as released by the Municipal Demarcation Board in January 2006.

Weighting

A two-stage weighting procedure was applied to the IES 2005/2006.

The PSU inclusion probability is given by

$$P_{PSU} = \frac{n_{PSU}}{N_{PSU}} \cdot n_s,$$

where n_{PSU} is the number of households constituting the selected PSU during census fieldwork, n_s is the number of PSUs per stratum, in this case the District Council (DC), and N_{PSU} is the number of households constituting the selected stratum during census fieldwork.

The household inclusion probability per PSU is given by

$$P_{HH} = \frac{n_{HH}}{H_{HH}},$$

where n_{HH} is the number of selected dwelling units per PSU, and H_{HH} is the number of dwelling units in the PSU in question at a particular time different from the census time.

The non-response adjustment factor is given by $\frac{1}{r_{HH}}$, where r_{HH} is the response rate and is given by

$$r_{HH} = \frac{n_{RESP}}{n_T} \text{ where } n_{RESP} \text{ is the number of responding households and } n_T \text{ is the total number of visited}$$

households (in the sampled dwelling units) per PSU. The design weights adjusted for non-response are now given by

$$W_{HH} = \frac{1}{P_{PSU} \cdot P_{HH} \cdot r_{HH}}$$

A SAS macro called CALMAR was used to benchmark W_{HH} to the population estimates.

How the IES 2005/2006 was conducted

The survey was conducted over a period of one year, from September 2005 to August 2006, with sampled households participating for one month and new subsamples of households starting every month. The data collection exercise involved physical visits to households at the selected dwelling units by trained fieldworkers. Data collection consisted of an extensive interview using a pre-coded questionnaire, which was split and conducted on five separate visits during the survey month. In addition, the selected household was required to record all its acquisitions for the survey month in diaries. A separate diary was used for each of the four weeks of the survey month. The reference periods were as follows:

Table A: Reference periods by type of item and type of data collection instrument

Type of data item	Reference period		Annualised reference period
	Diary (survey month)	Main questionnaire	
Non-durable items	One month	–	1 x 12 = 12 months
Semi-durable items	One month	Eleven months	1 + 11 = 12 months
Durable items	One month	Eleven months	1 + 11 = 12 months
Services	-	One or 12 months	1 x 12 = 12 months (if reference period is one month)
Income	-	One, 11 and 12 months	1 + 11 = 12 months if reference period is one and 12 months.

Fieldworkers were hired throughout the period of the survey to complete the main questionnaire by conducting the five interviews and to deliver and collect weekly diaries from households at the selected dwelling units. Whenever it was necessary, fieldworkers were required to assist households regarding how to record their acquisitions in the weekly diary.

Weekly diary and main questionnaire contents

Details about the questions included in the IES questionnaire and diary administered by fieldworkers are presented below. As indicated in Table B, the IES questionnaire has 19 sections (excluding the Flap), each of which focuses on a particular area of relevance to income and expenditure of households, and the diary has three different forms to record household acquisitions during the survey month.

Table B: Details about questions included in the IES questionnaire

Instrument	Section/Form	Contents
Diary	Form 1	Items acquired and paid for by the household.
	Form 2	Items acquired but not paid for by the household, such as gifts and/or maintenance received.
	Form 3	Monthly payments on services
Main questionnaire	Flap	Contact details, demographic information (name, gender, age, population group and information about the movement of people in and out of households during the survey month.
	Section 1	Information about persons in the household, such as source of income, educational level, whether or not they smoke, information about people who are not members of the selected household but are supported by the household.
	Section 2	Information about the area of purchase of goods by the household.
	Section 3	Information about dwellings, access to facilities and ownership of assets.
	Section 4	Household expenditure on housing.
	Section 5	Household expenditure on swimming pools and gardens.
	Section 6	Household expenditure when away from home (e.g. holidays).
	Section 7	Household expenditure on domestic workers.
	Section 8	Household expenditure on input costs for home production.
	Section 9	Household expenditure on clothing and footwear.
	Section 10	Household expenditure on household textiles.
	Section 11	Household expenditure on furniture and equipment.
	Section 12	Household expenditure on recreation, entertainment and sport.
	Section 13	Household expenditure on education and training.
	Section 14	Household expenditure on reading material.
	Section 15	Household expenditure on communication.
	Section 16	Household expenditure on transport.
	Section 17	Computer and telecommunication.
	Section 18	Household expenditure on finance charges, income tax and investments.
	Section 19	Individual and household income.

RESPONSE DETAILS

From the 24 000 dwelling units sampled across South Africa, 25 192 households were identified. Out of these, there was a sample realisation of 22 617 households, with the remaining 2 575 households were classified as out of scope due to a number of reasons, such as listing error, vacant dwelling, unoccupied dwelling, etc.

Table C: Response details by province

Response description	Classification of result	Western Cape	Eastern Cape	Northern Cape	Free State	KwaZulu-Natal	North West	Gauteng	Mpumalanga	Limpopo	RSA
1 = Completed	Response	75,1	85,8	86,5	84,2	83,6	81,8	82,3	84,0	87,6	83,2
2 = Non-contact	Non-response	1,5	0,1	0,3	0,1	1,4	0,7	0,7	1,0	0,4	0,8
3 = Refusal	Non-response	3,3	0,3	0,7	1,1	2,1	2,2	3,2	2,0	1,7	1,9
4 = Partly completed	Response	1,5	0,5	0,4	0,2	0,7	0,7	0,8	0,5	0,8	0,7
5 = No usable information	Non-response	0,1	0,0	0,0	0,1	0,1	0,1	0,0	0,0	0,1	0,1
6 = Vacant dwelling	Out of scope	7,4	8,8	6,7	8,3	4,0	7,3	4,3	7,0	5,3	6,3
7 = Listing error	Out of scope	2,1	0,6	0,6	0,6	1,3	0,7	2,0	0,3	0,5	1,1
8 = Other	Out of scope	5,3	1,2	3,2	2,5	3,2	3,0	3,6	1,8	1,2	2,9
0 = Disqualified	Non-response	3,7	2,8	1,7	2,8	3,5	3,4	3,2	3,5	2,4	3,1

THE DATA FILES

The files and their contents are as follows:

PERSON_INFO: Particulars on each person in household (Flap and part of Section 1)

SUPPORTED_PERSONS: Information on non-household members supported by the household (Section 1)

PURCHASE_PLACE: Where does the household purchase goods (Section 2)

HOUSE_INFO: Households' characteristics (Section 3)

TOTAL_IES: Income and expenditure per item per household (Section 4 to 18)

PERSON_INCOME: Individual income (Section 19)

All files are in text format.

MERGING THE FILES

The unique number is common in all the files and can therefore be used to merge files.

The IES 2005/2006 survey was conducted over a period of 12 months. Each household was visited for a period of six weeks. The first visit was an introduction to the survey during which households were informed that they had been selected to participate in the survey. The visit during the second week was to obtain information about the individuals in the household and persons supported by the household as well as place of purchase (Sections 1 and 2). Information on Sections 3 to 8 were administered in the third week, 9 to 12 in the fourth week, 13 to 17 in the fifth week and 18 to 19 in the sixth week.

Due to different reference periods for the different questions in the IES 2005/2006, there may be inconsistencies when merging some files, i.e a person may have indicated no income in Section 1 and yet reported income in Section 19.

THE CODE LISTS

COICOP: The Classification of Individual Consumption by Purpose (**COICOP**)¹:

This file provides the link between the **COICOP** codes allocated to an item, and the description of the item. The classification is hierarchical and presented in four levels, i.e. main-group level, secondary-group level, and third-group level and at detailed level. The expenditure files in the IES 2005/2006 data set link amounts to COICOP codes. This file can be merged with the different datasets in order to obtain the descriptions for

¹ United Nations Statistics Division – methodological publications

the different hierarchies of the COICOP codes. This can be done by merging the COICOP file with the expenditure/income file using the COICOP code as the common variable.

The COICOP file also indicates the reference period for which expenditure on a particular item was collected (e.g. one month, 11 months or 12 months), the section number in the main questionnaire in which the question/item was asked as well as the instrument (e.g. diary and/or main questionnaire) in which the information was collected.

PRODUCT

This is the product code list that is used in Section 2 of the questionnaire to establish the area of purchase of goods and services by the household.

Description of variables

The description of the variable comprises the following information:

Descriptive name: This is a short English description plus the variable name in the original file used by Stats SA to construct the ASCII file.

Position of the variable: The position of the data within the record, recorded in the format (@xxx y). “@xxx” indicates that the data begins at position (i.e. column) xxx and “y” indicates that it is y digits wide.

Explanation: This is a further explanation of the variable or, for derived variables, the method of derivation.

Valid range: The range of valid values for the variable. For continuous variables this reflects the upper and lower limits as found in the data.

Not applicable: The code for not applicable is provided for each variable. These are now numeric. For expenditure and income not applicable, value is not coded.

Missing value: A code for “missing”/unspecified values is given for each variable. For expenditure and income missing, value is not coded.

Notes: Specific observations to be noted by users.

Some of the questions in the Income and Expenditure Survey questionnaire are pre-coded, i.e. there are a set number of choices from which one or more must be selected. For open-ended ‘write-in’ questions, the description will note that post-coding occurred and explain how this was done. For most variables the coding is apparent from the questionnaire (available elsewhere in the documentation). Where the coding is not apparent, the description either provides the codes or indicates where code lists are to be found.

DATA FILE: PERSON_INFO

Unique number (UQNo) (@1 14.)

This is the unique household identifier, which can be used to link data from this file with data for the same household from

Valid range: 10101001000501–98486025007901

Note: The unique household identifier (UQNo) can be used to link data from this file with data from other files.

Person number (personno) (@15 2.)

Person number within a household

Valid range: 01–24

Flap:

Gender (Gender) (@17 1.)

B

1 = MALE

2 = FEMALE

Note to users

This question was asked for all household members, to determine their gender. The enumerators were instructed not to ask

Universe

All persons in selected households.

Final code list

1 = Male

2 = Female

9 = Unspecified

Population group (PopGrp)

(@18 1.)

- D What population group does belong to?
- 1 = AFRICAN/BLACK
 - 2 = COLOURED
 - 3 = INDIAN/ASIAN
 - 4 = WHITE
 - 5 = OTHER, *specify*

Note to users

This question was asked to determine the population group of all persons. The enumerator was instructed to ask the question for each member of the household. The enumerator was instructed not to make any conclusions, which may be influenced by his observation or based on people's names during the interview. This question may seem very sensitive to some respondents especially in this post apartheid era, but it is important to find out the composition of the South African population.

Universe

All persons in selected households.

Final code list

1 = African/Black

2 = Coloured

3 = Indian/Asian

4 = White

9 = Other and unspecified

Age group (Agegrp)

(@ 19 2.)

Derived variable

Final code list

01 = 00 – 04 years
 02 = 05 – 09 years
 03 = 10 – 14 years
 04 = 15 – 19 years
 05 = 20 – 24 years
 06 = 25 – 29 years
 07 = 30 – 34 years
 08 = 35 – 39 years
 09 = 40 – 44 years
 10 = 45 – 49 years
 11 = 50 – 54 years
 12 = 55 – 59 years
 13 = 60 – 64 years
 14 = 65 – 69 years
 15 = 70 – 74 years
 16 = 75 – 79 years
 17 = 80 – 84 years
 18 = 85 +
 99 = Unspecified

Note to users

This variable is derived from question C of the main questionnaire, 'How old is?' The instruction was to write the age in completed years to the nearest whole number and not in words. Thus if a person is two years and six months, the instruction was to write the '02' (completed years). For children aged less than a year, the instruction was to write '00'.

Mid-year population estimates are produced by five-year age groups. These estimates are applied during the benchmarking process. As a result skewness in estimates might occur when estimating age in single years.

E Did spend at least four (six) nights in this household during the period ... (NOTE: six nights at 5 th interview)	YES NO
1 = 1 st – 7 th of this month <i>Record at 2nd interview (week 2)</i>	<input type="checkbox"/> 1 <input type="checkbox"/> 2
2 = 8 th – 14 th of this month <i>Record at 3rd interview (week 3)</i>	<input type="checkbox"/> 1 <input type="checkbox"/> 2
3 = 15 th – 21 st of this month <i>Record at 4th interview (week 4)</i>	<input type="checkbox"/> 1 <input type="checkbox"/> 2
4 = 22 nd – last day of this month <i>Record at 5th interview (week 5)</i>	<input type="checkbox"/> 1 <input type="checkbox"/> 2

Note to users

This question was asked to determine the movement of people in and out of households during the survey month. E1 was asked at the beginning of the second week, E2 was asked at the beginning of the third week, E3 was asked at the beginning of the fourth week and E5 was asked at the end of the fourth week. The question captured visitors who are not household members. However these (visitors) were excluded from the PERSON_INFO data file.

Universe

All persons and visitors in selected households.

F Since the last interview, has any other person stayed in this household?

If “YES”, cross the box in the next empty column and complete A – F for each new person. Do not forget to ask E for new persons.

☐ 1

Note to users

The question captured visitors who are not household members. However, these (visitors) were excluded from the PERSON_INFO file.

Section 1

	YES	NO
1.1.1.1.a Which sources of income does have?		
01 = Salaries and wages	<input type="checkbox"/> 1	<input type="checkbox"/> 2
02 = Net profit from business or professional practice/ activities or commercial farming	<input type="checkbox"/> 1	<input type="checkbox"/> 2
03 = Income from subsistence farming	<input type="checkbox"/> 1	<input type="checkbox"/> 2
04 = Income from letting of fixed property	<input type="checkbox"/> 1	<input type="checkbox"/> 2
05 = Royalties	<input type="checkbox"/> 1	<input type="checkbox"/> 2
06 = Interest received and/or accrued on deposits, loans, savings certificates, and dividends on building society shares	<input type="checkbox"/> 1	<input type="checkbox"/> 2
07 = Dividends on shares other than building society shares	<input type="checkbox"/> 1	<input type="checkbox"/> 2
08 = Regular receipts from pension such as private pension, government pension and pension from other annuity funds	<input type="checkbox"/> 1	<input type="checkbox"/> 2
09 = Other social welfare grants	<input type="checkbox"/> 1	<input type="checkbox"/> 2
10 = Alimony, maintenance and similar allowances received from divorced spouse, family members, etc., living elsewhere	<input type="checkbox"/> 1	<input type="checkbox"/> 2
11 = Regular allowances received from non-household members	<input type="checkbox"/> 1	<input type="checkbox"/> 2
12 = Other income, <i>specify</i>	<input type="checkbox"/>	
13 = If "No" to all 01 – 12, mark here and → Go to 1.2		

Note to users

This was a multiple answer question. Respondents had to give an answer for each response category.

NB: For the purpose of IES 2005/2006 income (e.g. social grants) was recorded under a person who is receiving it, for example, if a respondent has a child that he/she is not living with and the respondent is receiving(collecting) the child's grant then the money was registered under the respondent's name/person number. In the expenditure section the respondent would report whether the money was used for maintenance or for household consumption.

26 = DON'T KNOW

Dipl Diplomas or certificates should be of at least six months study duration full-time (or equivalent)

Note to users

The enumerators were instructed that only those qualifications already obtained should be entered. That means the current level, that a person is still busy with is not applicable. It is very important to record information for each person even if the person has not attended school. The enumerators were instructed to record diploma and certificates that are of at least six months duration.

Unspecified highest level of education is included in code 26 (Don't know).

Universe

All persons in selected households.

Final code list

(@19

1.)

1.10 Is a male or a female?

1 = Male

2 = Female

Note to users

This question was asked about persons supported by members of the households. However, it is the supporting household that is being interviewed.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers that are supporting non-household members who live in special dwellings. i.e. boarding school/university hostel, old-age home, frail care centre, home for the disabled and initiation school (see skip in question 1.9).

Final code list

1 = Male

2 = Female

8 = Not applicable

9 = Unspecified

Age group (Agegrp)

(@20

2.)

Derived variable: Derived from Age**Note to users**

This variable is derived from question C of the main questionnaire, 'How old is?' The instruction was to write the age in completed years to the nearest whole number and not in words. Thus, if a person is two years and six months, the instruction was to write the '02' (completed years). For children aged less than a year, the instruction was to write '00'. The grouping of age is done to ensure respondents' anonymity.

The question is asked about persons supported by members of the households. However, it is the supporting household that is being interviewed.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers that are supporting non-household members who live in special dwellings. i.e. boarding schools/university hostels, old-age homes, frail care centres, homes for the disabled and initiation schools (see skip in question 1.9)

f) <i>Other (Q41fOccRooms)</i> Number of other rooms occupied Valid range: 0–3	(@88	1.)
f) <i>Other (Q41fNoRooms)</i> Total number of rooms in the dwelling unit Valid range: 0–5	(@89	1.)

Note to users

Question 4.1.b was meant to be asked to households living in dwelling units that are permanent structures such as a brick house on a separate stand, town house, flat, etc. In addition, in the case of a multiple household situation, only the main household was required to report on this question.

Universe

Question 4.1.a: All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Question 4.1.b: All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers occupying a permanent structure were required to report on this question. In case of a multiple household situation, only one household was required to report on this question.

4.2	Is there any garage that belongs to the dwelling unit that the household occupies?	YES	NO
		<input type="checkbox"/> 1	<input type="checkbox"/> 2
	If Yes, For how many cars?		

Garage belonging to the dwelling unit (Q42Garage) (@90 1.)

Note to users

This question is linked to question 4.1(b). It was asked to determine the value of the house. Only households occupying a permanent structure were required to report on this question. In the case of a multiple household situation, only one household was required to report on this question.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers occupying a permanent structure were required to report on this question. In case of a multiple household situation, only one household was required to report on this question.

Final code list

1 = Yes
2 = No
9 = Unspecified

Number of cars (Q42NoCars) (@91 1.)

Note to users

(See note to users in question 4.2)

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers owning at least one motor vehicle and occupying a permanent structure were required to report on this question. In case of a multiple household situation, only one household was required to report on this question.

Valid range: 0–6

Value of the dwelling unit (Q44value)

(@92 7.)

4.4	What is the value of the dwelling unit?	
	<i>Give the value in Rand.</i>	

Note to users

This question is linked to question 4.1(b). It was asked to determine the value of the house. Only households occupying a permanent structure were required to report on this question. In the case of a multiple household situation, only one household was required to report on this question. Interviewers were asked to measure the area of the dwelling unit if the respondents could not provide the estimate.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers occupying a permanent structure were required to report on this question. In case of a multiple household situation, only one household was required to report on this question.

Valid range: 0–7800000

Imputed value of the dwelling unit (Q44ValueImputed)

(@99 6.)

Note to users

This is a derived variable. If a household did not report the value of their dwelling unit, the average value of households with similar characteristics as the one with a missing value was used. Where households reported a value of the house in question 4.4, then Q44ValueImputed is missing.

Valid range: 100–900000

Dwelling ownership (Q45OwnRent)

(@105 1.)

4.5	Is the main dwelling	
	1 = Owned and fully paid off → Go to Q4.6.5.5	<input type="checkbox"/> 1
	2 = Owned, but not yet fully paid off (e.g. with a mortgage) → Go to Q4.6.5	<input type="checkbox"/> 2
	3 = Rented as part of employment contract of household member	<input type="checkbox"/> 3
	4 = Rented not as part of employment contract of household member	<input type="checkbox"/> 4
	5 = Occupied rent-free as part of employment contract of household member	<input type="checkbox"/> 5
	6 = Occupied rent-free not as part of employment contract of household member	<input type="checkbox"/> 6
	7 = Occupied as a boarder/lodger → Go to Q4.6.4	<input type="checkbox"/> 7
	8 = Other, specify	<input type="checkbox"/> 8

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Final code list

- 1 = Owned and fully paid off
- 2 = Owned, but not yet fully paid off (e.g. with a mortgage)
- 3 = Rented as part of employment contract of household member
- 4 = Rented not as part of employment contract of household member
- 5 = Occupied rent-free as part of employment contract of household member
- 6 = Occupied rent-free not as part of employment contract of household member
- 7 = Occupied as a boarder/lodger
- 8 = Other
- 9 = Unspecified

Total number of rooms that this household occupies (Q41TotOccRooms) (@106 2.)
 Total number of rooms occupied
 Valid range: 0–15

Total number of rooms in the dwelling unit (Q41TotNoRooms) (@108 2.)
 Total number of rooms in the dwelling unit
 Valid range: 0–19

Note to users

Question 4.1.b (total) was meant to be asked to households living in dwelling units that are permanent structures such as a brick house on a separate stand, town house, flat, etc. In addition, in the case of a multiple household situation, only the main household was required to report on this question.

Universe

Question 4.1.a (total): All households.

Question 4.1.b (total): All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers occupying a permanent structure were required to report on this question. In case of a multiple household situation, only one household was required to report on this question.

Household consumption (Consumptions) (@110 7.)

Derived variable**Note to users**

This is the total un-weighted household consumption, annualised and inflated/deflated to March 2006 prices using the Consumer Price Index (CPI).

Part	Date	Result code	Result codes
Initial visit			1 Completed
Diary 1			2 Non-contact
Diary 2			3 Refused
Diary 3			4 Partly complete
Diary 4			5 No usable information
Main questionnaire			6 Vacant dwelling
			7 Listing error
			8 Other
			9 Ended at question B
FINAL RESULT			

COMMENT!

Note to users

The data include only the final result codes one (1) and four (4).

Universe

All selected dwelling units.

Final code list

1 = Completed

4 = Partly completed

Weight of the household (Weight)

(@139 12.6)

Valid range: 4.7952512–15054.55

DATA FILE: TOTAL_IES**Note to users**

This file contains all income and expenditure acquired by households. Each record represents an item (income/expenditure) acquired by a household. If a household acquired an item multiple times the sum income/expenditure of that particular item will be shown as one record within the household.

Unique number (UQNo)

(@1 14.)

This is the unique household identifier, which can be used to link data from this file with data for the same household from

Valid range: 10101001000501–98486025007901

Coicop code (COICOP)

(@15 8.)

Classification Of Individual Consumption according to Purpose. (See COICOP Code list)

Valid range: 01111101–99111312

<i>Coicop type (COICOPType)</i>	(@23	2.)
1 = Consumption		
2 = In-kind-consumption		
3 = Income		
4 = In-kind-income		
5 = Savings		
6 = Taxes		
7 = Transfers to others		
8 = Debts		
9 = Loss		
10 = Other products not in consumption		

Value in main questionnaire (ValueMain) (@25 8.)

Note to users

This is the value of the item in the main questionnaire. If the reference period for this item was 11 or 12 months then the value in the data file is as it was recorded in the questionnaire. If, however the reference period was one month then the value in the main questionnaire is multiplied by 12 and a product is reflected in the data file (See table A)

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Valid range: 0–7160000

Value in diary (ValueDiary) (@33 8.)

Note to users

This is the value of the item in the diary. If the item is only collected from the diary, then the amount in the diary is multiplied by 12. The result is then reflected in the data file. However, if the item is collected through both the diary and the main questionnaire then the value recorded in the diary is reflected in the data file as is.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Valid range: 0–425574

Value of expenditure on the item (Value) (@41 8.)

Note to users

This represents income/expenditure on an item from diary and/or main questionnaire. If the income/expenditure on an item is collected through, both instruments i.e. the diary and the main questionnaire, then the total amount is reflected in this column. If it is collected from one instrument, the main questionnaire or the diary then the values from *valuemain* or *valuediary* were transferred (respectively) to the value column.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Valid range: 0–7160000

Annualized value in main questionnaire (ValueMainannualized) (@49 8.)

Derived variable

Note to users

This represents the value from the main questionnaire that has been inflated/deflated to March 2006 using the CPI.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Valid range: 0–7253992

Annualized value of the item in the diary (ValueDiaryannualized (@57 8.)

Derived variable**Note to users**

This represents the value from the diary that has been inflated/deflated to March 2006 using the CPI indices.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Valid range: 0–425574

Annualized value of expenditure on the item (Valueannualized) (@65 8.)

Derived variable**Note to users**

This represents the total value from the columns '*Valuemainannualized*' and/or '*Valuediaryannualized*'.

Universe

All domestic households, holiday homes and all households in workers' residences such as mining hostels and dormitories for workers.

Valid range: 0–7253992

Weight (weight) (@73 12.6)

Valid range: 4,795251–15054,554461

DATA FILE: PERSON_INCOME

Note: This file contains only the records of the persons who reported income.

Unique number (UQNo) (@1 14.)

This is the unique household identifier, which can be used to link data from this file with data for the same household from

Valid range: 10101001000501–98486025007901

Person number (personno) (@15 2.)

Person number within a household

Valid range: 01–22

Coicop code (COICOP) (@17 8.)

Classification Of Individual Consumption According to Purpose. (See COICOP Code list)

Valid range: 50110000–50420000

Annual individual income (value) (@25 7.)

Derived variable**Note to users**

This is the individual income derived from summing question 19.1 (income for 1 month) and 19.2 (income for 11 months prior to the survey month) from the main questionnaire not adjusted to March 2006 as this was done at household level. For confidentiality purposes the top 10 salaries were combined and an average salary was given to each person in that group. Data is given in its original form without imputations to users. For full details as to how imputations were done - please refer to the Income and Expenditure of households 2005/2006, statistical release P0100.

Valid range: R1–R3 600 000

Universe

All persons in selected households.

Weight (weight) (@32 12.6)

Valid range: 4,795251–15054,554461
