This is a study about household welfare in South Africa, run by researchers at the University of Cape Town for the South African Presidency. The purpose of this study is to learn more about how people in South Africa are faring over time and the reason we selected this minor and this household is that the minor was freshly selected this year or the minor and/or other members of the household participated in the first round of this study in 2008 and/or the following rounds in 2010/2011, 2012 and 2014/2015. We would like to ask some questions of this minor in your care covering personal information including about education, employment, income, family and health; this will include height, weight, waist and blood pressure measurements taken using basic measuring equipment.

We want to make sure you understand the following information about the study:

- The participation of the minor is entirely voluntary. This applies to any question, sub-question, section or sub-section. The minor can skip any question or section and stop at any time.
- The average amount of time for this interview is about 45 minutes.
- The minor has the right to ask the interviewer questions at any point in time.
- All information collected for this study that could identify the minor or the minor's household will be kept strictly confidential.
- We will ask some questions of others in the household that may refer the minor, e.g. the minor may be identified as having their education paid for by another household member.
- The minor's personal details will be kept on record in order that the minor can be re-contacted to participate in future studies that form part of this project. However, we will ask your (should this person still be a minor) and the minor's permission to participate in the survey again each time. Agreeing to participate now does not mean that the minor has to participate in future surveys.

By signing below, you signify that you agree to participate in the study, and that your participation is entirely voluntary:
