NOTES

Overview

ABSTRACT

The Cities of Integrity: Urban Planning and Corruption in Africa Project was based at the African Centre for Cities at the University of Cape Town. The Project ran from 2019-2021 as part of the Global Integrity Anti-Corruption Evidence Programme (GI-ACE), which supported 14 research partners around the world in generating actionable evidence to assist policymakers, practitioners, and advocates to design and implement more effective anti-corruption programmes. In collaboration with the Center for Urban Research and Planning at the University of Zambia, the Project conducted an online survey of planning and urban development professionals in South Africa and Zambia regarding their experience and perceptions of ethics, integrity, and corruption in their work and their profession.

KIND OF DATA

Focus group and survey data

UNITS OF ANALYSIS

Individuals

Scope

NOTES

The survey collected data from the urban planners on the following: Demographic information, professional background, practical experience, expert judgment of corruption risks, values and beliefs regarding professional ethics.
