### STUDY TYPE

Enterprise/Establishment Survey

### ABSTRACT

Statistics South Africa (Stats SA) conducts a monthly survey covering electricity undertakings and establishments (branches) in the electricity industry. This data contains monthly information regarding the volume of electricity units:

Generated and distributed in South Africa;

Flowing into and out from South Africa as measured by the metering systems at the South African borders;

Delivered to provinces.

Both unadjusted and seasonally adjusted data is included. In accordance with international practice, the indices are usually re-based every five years to a new base year. The base period for 2020-2025 is 2015. Some information for the current month may have been estimated due to late submission by respondents. These estimates will be revised when new data is available. The results of the monthly electricity survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy.

## Scope

---

### NOTES

The data covers electricity undertakings and establishments conducting activities concerned with the generation and/or distribution of electricity (excluding the distribution of purchased electric energy). It includes electrical power installations, which, as subsidiary divisions of undertakings, produce electricity for regular use by these undertakings.

## Coverage

---

### GEOGRAPHIC COVERAGE

The survey has national coverage.

### GEOGRAPHIC UNIT

The data is at the level of province.

## Sampling

### SAMPLING PROCEDURE

All statistical units are stratified by type of economic activity according to the Standard Industrial Classification of all Economic Activities (SIC) and measure of size, where measure of size is the volume of electricity generated by the electricity undertaking or establishment. All large undertakings or establishments (size group one) are completely enumerated. A sample is drawn from medium and small size undertakings and establishments by systematically selecting undertakings or establishments within each size category. An electricity undertaking or establishment with a total generating capacity of less than 500 kilowatts is excluded from the sample.

## Data Collection

### DATES OF DATA COLLECTION

Start	End
1985-01	2024-06

### DATA COLLECTION MODE

Internet and telephone

### DATA COLLECTION NOTES

The survey is conducted by email and telephone. Information is collected from a sample of electricity undertakings or establishments. As from September 2013, Eskom supplied additional data for independent power producers (IPPs) that were not in the original sample of establishments.
